

The European Academy of Wind Energy (EAWA) announces

6th PhD Seminar on Wind Energy in Europe

30th September and 1st October 2010

Norwegian University of Science and Technology, Trondheim, Norway

The seminar

The seminar will provide an opportunity for PhD Students and their supervisors from all over Europe to exchange information and experience on research in wind energy, to meet new people and create networks. The seminar will include:

- oral and poster student presentations
- guest lectures from the Norwegian offshore wind industry, given by: **Finn Gunnar Nielsen** (Statoil), **Jørgen Jorde** (Norwind) and **Terje Gjengedal** (Statnett)
- visit of NTNU wind energy research facilities
- an excursion to Smøla wind farm
- a social program including conference dinner

As in previous years, the seminar will have free attendance, but accommodation has to be arranged by the participants themselves.

Call for papers and program

All PhD students are invited to present their work in form of an oral presentation or a poster. A short paper of four pages is requested, templates are available on the seminar webpage. The following deadlines are established:

- **15.06.2010** for submission of abstracts
- **31.08.2010** for submission of papers

The seminar will be held on Thursday 30.09. and Friday 01.10. with the offer to join an excursion to the wind farm at Smøla on Saturday 02.10.

The excursion

Smøla wind farm is located on the island of Smøla on the north-west coast of Southern Norway. The wind farm is situated in a flat and open landscape 10-40 meters above sea level, with the wind turbines dotted along the ridges of hills. 68 wind turbines with respectively 2.0 and 2.3 MW generate around 450 GWh in a normal year. The wind farm was built in two phases, 2002 and 2005 and was at the time of its opening Europe's largest onshore wind power facility.

Location

Trondheim is the third largest city of Norway located at the Trondheim fjord, approximately 500km south of the Polar Circle. Trondheim has around 180.000 inhabitants, whereof every sixth is a student. The city is the Norwegian center of technical and medical education and research with NTNU and SINTEF (the largest independent research organisation in Scandinavia) and has a rich cultural life with an international flavour.
